

Mid 19th Century Convex Dial Clock

Sold

REF: 101223

Depth: 17 cm (6.7")

Diameter: 36 cm (14.2")

Description

A good mahogany circular wall clock. It has a mahogany case with a slim outer wooden rim and a cast brass bezel, a convex glass and a convex painted dial. The outer pegged case has a bottom and side door. The 8 day fusee movement has shaped plates and a large brass bob pendulum. The dial is signed by the maker, Quafe of Battle.
